About This Game

THE MACHINE AGE HAS BEGUN in this immersive and atmospheric squad-based shooter in which you need to regain control of a futuristic Tokyo from an emerging robotic threat.

Set in 2080, the story starts when Dan Marshall and his squad are sent to bring the robotic community under control as they begin to infiltrate society and slowly take over undetected, leaving humans redundant in their wake.

Thrilling encounters with highly intelligent robotic enemies require you to think tactically, make challenging, real-time moral decisions and build up trust with your team mates in order to guide your squad to safety and success.

Key Features:

- **A NEW TAKE ON FUTURISTIC TOKYO** - Experience dual layered Tokyo with a run down and derelict lower city and a clean and affluent upper city.

- **THE CONSEQUENCE SYSTEM** - Under the pressures of battle every action, every choice and every word affects everything.

- **PROCEDURAL DAMAGE** - Fully destructible and highly resilient robots adapt to the damage they sustain encouraging you to analyse each enemy, find their weaknesses and dispose of them in the most efficient way.

- **WEAPON MODIFICATION AND SKILL SELECTION** - Alongside a full armoury of unique weapons, put

emphasis on the skills that will benefit you.

POLAR BEAR

You'll find Polar Bears in the broad expanses of the glacier fields in Northeast Antaloor. Thanks to the merciless weather conditions up there, these beasts have become tremendously hardy combat specialists - a real threat for any warrior who maybe hasn't spent enough time with his Trainers!

Name	HP	Level	Loot	Fight with
Polar Bear	10,000-12,500	20-25	Claw	Sword, Fire Magic

UNDEAD BEAR

With their occult experiments, the Necromancers continually create ghastly versions of reality - and the Undead Bear is one of these. Being a magic creature, it's a dangerous monster... one of its favorite tricks is to poison its adversaries.

Name	HP	Level	Loot	Fight with
Undead Bear	7,500-10,000	15-20	Claw	Sword, Fire Magic

TiP When you take on the undead, you should have healing potions and/or herbs at hand in your inventory - these will counteract the poison meted out by the undead monsters' blows - which, by the way, can kill you.

TULOK

These are headless monsters - a sub-species of the demons, they live only in the underworld. No one knows how these beasts lost their heads over centuries of evolution - but all of Antaloor does know that they're one of the most dangerous entities ever to evolve on the planet! In the dank, dark passageways of the dungeons, eyes are an unnecessary luxury anyway... so being headless is more of an advantage for them.

The Tulok go berserk in the narrow passageways, bringing certain death to all but the fleet of foot.

They also have an unbelievable amount of endurance in a fight...

Name	HP	Level	Loot
Tulok	5,000-20,000	10-40	Heart

Fight with
Sword, Water Magic, Air Magic

DEMON

Demons really live up to their reputation - among their ranks, you'll find some of the most dangerous creatures in all of Antaloor.

They have huge paws with razor-sharp claws - and those, combined with their long reach are perfect for dealing a deadly one-two.

Their skin consists of a leathery substance, partly covered with scales - an almost impenetrable armor. If these creatures have any weakness at all, it could be their somewhat slow reaction time.

Name	HP	Level	Loot
Demon	12,500-20,000	25-60	Eye

Fight with
Two-handed Sword, Water Magic

WINGED DEMON

In addition to the 'normal' demon, the unwary traveler is sure to meet the "Hell Demon."

They're winged - and that's what helps them to move a lot faster than the other demons... spelling out danger with a capital D.

Name	HP	Level	Loot
Winged Demon	15,000-37,500	30-75	Wing Membrane

Fight with
Two-handed Sword, Water Magic

I played a bit. It\u2019s pretty good.. I Brought this game so you don't have too.

This game is beyond bad. I know it is only 50p (at least when i brought it), but this game wouldn't have even stayed in my steam library if it was free. The control scheme is horrendous, the camera angle is nausiating, and you cant even complete the first level (seriously - the finish DOESNT WORK). How can a game be made so badly.

You might as well just stare at a black screen. Its cheaper, and probably more entertaining than this game.. Fun scifi space based city building game with away missions made by awesome devs!
Even better is that Spatials owners will be getting the Spatials Galactology for free :). A little chalenging but I love a chalenge.
Got this while it was in early development and it was quite good. Came back to it months later and it was absolutely fantastic. The game has changed so much over it's development and it is a shining example of how early access can be done right.. It won't start up. Seems like to me devs want the money but don't want you to play it. play 2 instead! Thumbs Down.

I absolutely love the breakout (brick-breaking) type games, and Shatter is just that, except on steroids. It's really addicting, fast-paced, flashy, and much more involved/interesting than your typical brick-breaking game. Instead of your paddle being restricted to the bottom of the screen, many levels have it on the side. Also, there are levels where your paddle is allowed more freedom than just one side. The bonus levels are fun, and the soundtrack is great. I also like how there are really cool bosses for each level. There have been many times when I lost track of time while playing.. While miles better than their first Sherlock Holmes game, this second outing is still not good. The plot's a bit of a jumble, and the items you have to find far too hidden. There's also no first person option, so most of the game is spent watching Holmes walk slowly around the large areas.

Frogwares gets better though! In fact every game after this is well worth playing, even the silly Hound of the Baskervilles.. It's like a generic waifu fighting game but on mid-air. I feel like I must write a review on this program. Most serious art programs cost well above 50, with few exceptions. This is a solid art program that doesn't seem to have quite the same number of features as Photoshop, but compensates by having some rather unique features of its own. It is very fast, surprisingly so considering its features. The only real issues I've had with it is the keyboard shortcuts are rather unconventional and awkward at times... There's some brilliant improvements and innovations to workflow, but some rather odd choices as well that makes it difficult to work with when color picking with certain tablets. I also cannot find some traditional stuff like lightening and darkening, but I think this is likely due to my own lack of familiarity with the program. Overall, I've to recommend it for the sheer value for money factor.. Bought this game Yesterday , well what can i say ? The Best Game i have ever bought , it is the definition of value for money ! The Graphics are HQ and they have improved so much more to do with the little things such as a updated and easier to use shopping system and new vehicles . The New Engine is Superb creating tracks for your vehicle in the mud and dust effects as well as your machinery getting dirty meaning you have to clean it , the Forestry is just the iceing on the cake I LOVE IT ! So if you have the choice to buy this game , DO IT you will never regret it !. UNFORGIVING
