Supreme league of Patriots:  
~~~~~

Supreme league of Patriots is a point and click adventure in three episodes. As I finished the first episode 'A Patriot is Born', and thoroughly enjoyed it, here is a review based on the first one.

You will play Kyle (not the brightest character you'll ever play), who is trying to enter the latest American Reality TV show, 'America's Got Super Powers', as the Purple Patriot. His best mate, Mel who accompanies him at the audition, is an illegal alien in New York (just like 'An Englishman in New York' from Sting, a fabulous song by the way) and has a fantastic and witty sense of humour.

The contrast between the two main characters really makes the game, in my opinion. You will also meet other very interesting characters, the likes of 'The Cold War Warrior', 'Consuela' and the panel of judges who will give you plenty of surprises.

You will not have many difficulties in the puzzles but if you do, just speak with your counterpart and ask for his help; you will be pointed in the right direction.

The artwork is well done, a marvellous soundtrack and a fun story. It is refreshing to play a game that takes the mickey out of the society we live in!

Positives:  
~~~~~

- Great artworks \ Characters
- Seriously funny dialogue
- Fun Story
- Achievements
- Trading cards

Negatives:  
~~~~~

- Inventory system not so easy to use

I am looking forward to play the next two episodes.

I must warn you, you will experience outbursts of laughter playing this game!

[FOLLOW THE CPT FROGGY CURATOR PAGE HERE. A set of clever puzzles within the Offworld game rules, with a little narrative flavour. Well worth the price of a pint!. I like this game because it has really good graphics and nice story!. I rarely played these games growing up so this was intense as hell for me. Loving it so far, just defeated Mothership boss and my heart was pumping.](#)

[Definitely worth it!. Great test for RTX cards, proving that ray tracing is a real bear. I got a 5800 on the nose @ 27 fps out of my i9-9900K & RTX 2080 XC. If you want to know just what your new card can do, get this upgrade for \\$2.99](#)

[EDIT 01/27/19: I got all the way up to 5961 score @ 27.60 fps res. 1440p using high power. Great program for playing around!](#)

The steam description of this DLC is a little off. What the Endless Challenge really is, is the test of wisdom except you do not start with any intel and the score requirement for the elite leaderboard is higher. So Basically you must kill all 5 warchiefs and all 20 captains without any starting intel. And within 50 minutes. Now I could see how people would be upset about it not truly being an "endless challenge" however to me this has been the greatest actual test of skill the game has to offer. Plus its a bunch of fun to not worry about what captains you want to keep around and really just kill as many as you can, as stylishly as you can. I bought the Season pass from the beginning but after seeing how they're releasing the DLC for this game I'd still recommend getting it. The trials feel like 1 complete package and are kind of lacking on their own.. Super good as usual from Rusty Lake, and a nice continuation to the storyline. I definitely recommend buying but also playing all of the online games at <http://www.rustylake.com/> in order to understand the plot.. Can't make him say Allahu Akbar on command. 0/10.. Good game for a cheap price, There's one problem though, The reloading is a bit tricky (Specially the revolvers) The tracking pad sometimes doesn't fully track the motion of the finger, But it's good anyway!. I cannot find big difference from civ series.. but it was playable - I would rather play in small size than bigger size map. It's too repetitive if I play it in bigger size map. waiting for progression. the ships are sooo slow very realistic i guess but damn they are slow
